FALLER Workshops 2025

Creative modelling experiences for beginners and professionals

Layout construction

We will show you how you too can build and design a wonderful model layout. You will receive valuable hints, advice, practical experience and many illustrative tips as optimal support to give shape to your creative ideas - from the substructure and landscaping to rock and water design.

Car System

You will learn everything about road construction, vehicle technology and the various control components and control modules for planning and constructing road layouts and traffic scenarios that are suitable for traffic.

Car System Digital

In this seminar you will learn all the special features of digital vehicles and their interaction with the Car System Digital hardware and software. What are the differences between Car System and Car System Digital? How do ultrasonic localisation and radio communication work? How are they controlled? No question remains unanswered.

Car System Digital »Vehicle conversion«

Over the course of two days, you will learn all the theoretical and practical skills required to convert a conventional, analogue Car System model vehicle for Car System Digital operation. After the vehicle conversion, your vehicle will have many new digital functions.

The number of participants is limited. All information at: faller.de/en/workshops

110138

»Oberstenfeld« Railway station

The train slowly rolls onto the track and the passengers on the platform prepare for departure. The station with its light blue and white wooden façade, modelled on the original Oberstenfeld station, is a real eye-catcher on the model layout. Oberstenfeld is located on the Bottwartal railway between Marbach and Heilbronn. Following the closure of the railway, the station was restored and now serves as a local community meeting place. It embodies the charm of a typical small-town railway station, full of loving details that give it a special character.

Epoch III • 182 x 104 x 138 mm • 04/25

120301

Bus shelter

Small but nice! The sky-blue waiting shelter with a charming wooden façade is ideal as a decoration for your model railway. It also perfectly complements Oberstenfeld station and as a small detail, the model embellishes any railway scenery.

Epoch III • 81 x 81 x 58 mm • 03/25

Optionally available in two variants.

110137

»Uderns« Railway station

A small model railway rolls leisurely through the dreamy landscape and heads towards the »Uderns« station - a charming miniature model with half-timbered elements, inspired by the original on the Zillertalbahn in Tyrol, Austria. This picturesque railway line runs from Jenbach to Mayrhofen and winds its way through beautiful mountain landscapes. The special thing about the Zillertalbahn is that it is a narrow-gauge railway with the Bosnian gauge of just 760 mm. It almost makes you want to recreate the original yourself!

Epoch III - 170 x 102 x 88 mm - 04/25

120274

»Zuoz« Switch house

The brick model switch tower impresses with its stone-faced plaster façade, which gives it a robust character. A covered external staircase leads up to the entrance and the gabled roof with red stone slabs gives the building a classic touch. Inside, all electronics are well protected and safely stowed away - a reliable place for controlling and monitoring technical processes in miniature format.

Epoch II - Patinated model - 88 x 76 x 135 mm - 06/25

120079

Electric locomotive shed, 2-stall

The spacious locomotive shed in a modern design with bright red accents offers enough space for two electric locomotives. Both vehicles easily find their place in the double-track building. The shed can also be used as a workshop or maintenance shed. This makes any care and maintenance of the electric locomotives child's play for the miniature railway staff.

Suitable for locomotives with a gauge of up to 300 mm.

Epoch IV • Locomotive shed: 404 x 195 x 130 mm •
Space between centre of tracks: 79 mm • 04/25

130121

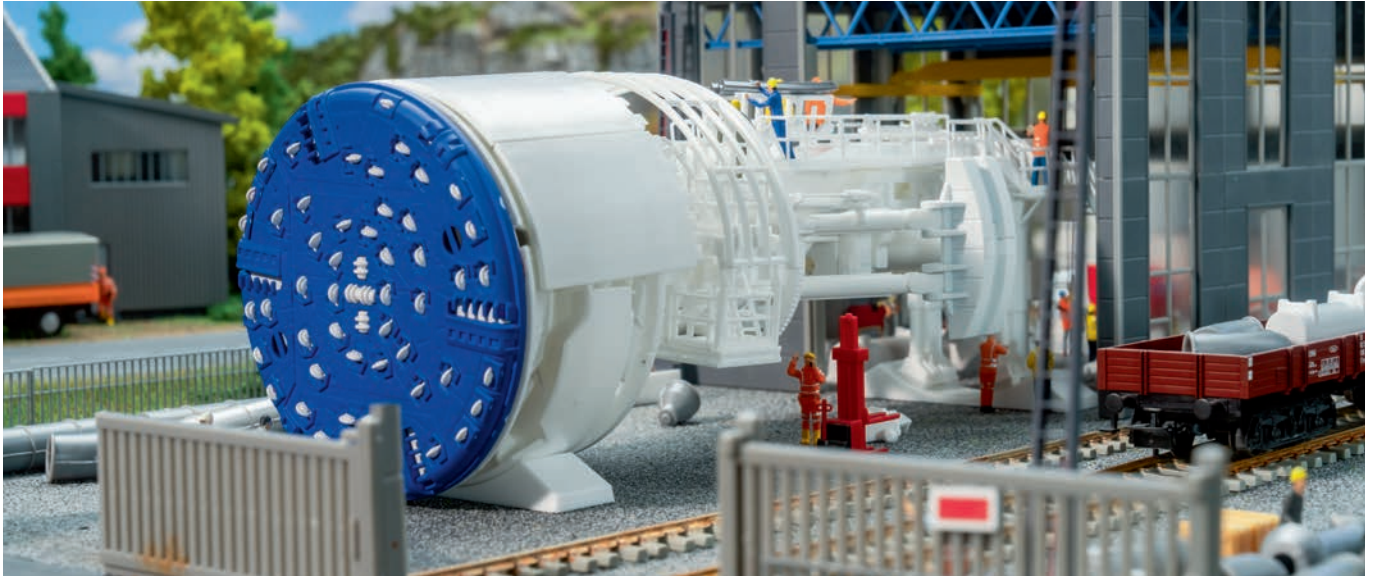

»CLAAS« Agricultural machinery workshop

This modern agricultural machinery workshop with its three gates is ideal for large vehicles and their trailers. It is modelled on the original from the »CLAAS« company and has a digitally printed façade based on the original. Perfect for giving the tractors and agricultural machinery of miniature farmers a home and embellishing the modelling set with a little rural flair.

The agricultural machinery workshop is suitable for Car System vehicles to drive through.

Epoch VI • 252 x 152 x 85 mm • 04/25

130897

Tunnel boring machine under construction

The white tunnelling machine is under construction and will soon be penetrating deeper and deeper into the mountain with impressive force. The detailed miniature model, inspired by the original Herrenknecht Gripper TBM, offers fascinating insights into the impressive world of tunnelling. For even more realism, the geared motor (Art. 180722) can be retrofitted to set the drill shield in motion - bringing the enormous engineering feat to life in model format.

Epoch V • Moveable model • 240 x Ø 85 mm • 06/25

180693

Construction worker with compressor

Surrounded by the noise of the construction site and the roar of the machines, the construction worker is hard at work with his compressor. This movable model brings lively dynamics to any construction site and adds a touch of realism to the scenery. Thanks to the matching construction machinery and an engine included in the set, the miniature world comes to life. An indispensable element that enriches every diorama!

Epoch V • Moveable model • incl. motor • 74 x 46 x 27 mm •
Depth: 20 mm • 03/25

180338

»Police« and »DRK« Office containers

Always and everywhere active! With the mobile ambulance and the DRK container, miniature rescues are child's play. Bring some realism to your diorama and bring your model town to life!

Epoch VI • Container 1: 70 x 28 x 33 mm • Container 2: 70 x 28 x 38 mm • 01/25

130157

Gasometer with pipework

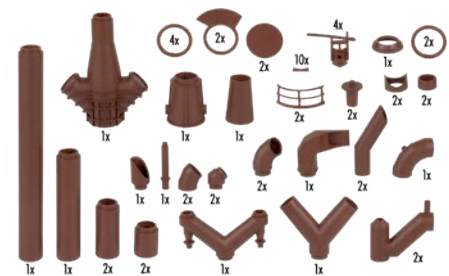

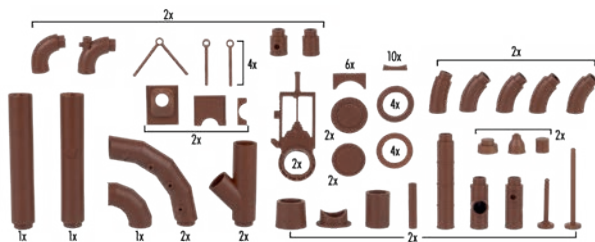

With this gasometer and pipework, heavy industry is making its way into your model railway. The model features a sturdy steel frame, catwalks and ladders that simulate maintenance routes and access points. A large pressure gauge as well as warning and information signs lend the gasometer additional realism and emphasise its industrial character. The detailed model can be perfectly combined with the new pipework sets (Art. 180327 and Art. 180328) and can be set up at two different heights.

Epoch II - Gasometer:

160 x 160 x 180 mm •

Pipework: Ø 22 mm •

04/25

180327

Pipeline set

With this versatile pipework set, creating a realistic heavy industry landscape is child's play! Pipelines of different lengths, straight and curved in various diameters allow you to create an authentic pipe system in your miniature world in no time at all. The freely combinable parts offer countless possibilities and can also be perfectly extended with the »Large pipeline set« (Art. 180328) and the »Gasometer with pipework« set (Art. 130157). This creates an impressive industrial plant that enriches your model landscape! Pipes with a diameter of 10 mm and 18 mm in various lengths. Including various corner pipes, connectors, branches, transition pieces and connection options to diameter 6 mm.

Epoch III - 04/25

180328

Large pipeline set

With this versatile pipework set, creating a realistic heavy industry landscape is child's play! Pipelines of different lengths, straight and curved in various diameters allow you to create an authentic pipe system in your miniature world in no time at all. The freely combinable parts offer countless possibilities and can also be perfectly extended with the »Pipeline set« (Art. 180327) and the »Gasometer with pipework« set (Art. 130157). This creates an impressive industrial plant that enriches your model landscape! Pipes with a diameter of 22 mm in various lengths. Including various corner pipes, connectors, branches and transition pieces to diameters of 20 mm and 18 mm, as well as connection options to diameters of 10 mm and 6 mm.

Epoch III - 04/25

130790

THW Building

The THW has always been on hand in emergency situations and disasters for 75 years. Now your diorama can also be equipped with the new hall of the THW. This hall offers space for all the important machines and vehicles that are indispensable in crisis situations. With this authentic model, which commemorates the 75th anniversary of the THW, the miniature world is also safe from disasters! The THW building is suitable for Car System vehicles to drive through.

Epoch V - 205 x 155 x 120 mm - 01/25

130153

E-fuelling station

The energy revolution has now also reached the world of modelling! This electric petrol station with stylish roofing and charging points of different sizes for every need brings a breath of fresh air to your miniature landscape. It is not only a symbol of modern mobility, but also gives your scenery a contemporary flair. The electric charging station is also suitable for Car System vehicles.

Epoch VI - 141 x 81 x 91 mm - Depth: 10 mm - 03/25

10

130712

Townhouse, 6-storey

Loud honking and hustle and bustle characterise the city centre. The slim, bright townhouse with a charming tailor's shop on the ground floor looks down on the miniature hustle and bustle. With its typical design, this town house enriches any town centre and is particularly suitable for building a connected row of houses. The model can also be built in a four or five-storey version as required.

Epoch III - 105 x 111 x 268 mm - 02/25

130713

Townhouse, 4-storey

This typical rust-red town house, which extends over four floors, is a delight with its elegant black metal railings and a shoemaker's shop on the ground floor. It is the perfect addition to any row of houses and adds a charming, urban flair to your miniature cityscape.

Epoch III - 105 x 111 x 206 mm - 02/25

180998

10 Iron bollards

These 10 iron bollards add a charming accent to paths in parks and on roadsides. Such lovely details help to make the model layout look more lively and authentic and are therefore indispensable.

Epoch II - 04/25

180999

10 Concrete bollards

These 10 concrete bollards are an absolute must for anyone who wants to add the finishing touches to their paths and roadsides. Such lovingly designed details make every model layout look more lively and authentic and are therefore indispensable.

Epoch IV - 03/25

130648

»ModernLife« WeberHaus

This modern WeberHaus with its elegant roof and gleaming white exterior is the perfect addition to stylish, contemporary neighbourhoods on the model building site. The minimalist design and futuristic look add a touch of luxury and sophistication to your miniature world. Ideal for creating urban living spaces and showcasing the modern charm of an upmarket neighbourhood.

Epoch VI • 140 x 119 x 91 mm • 06/25

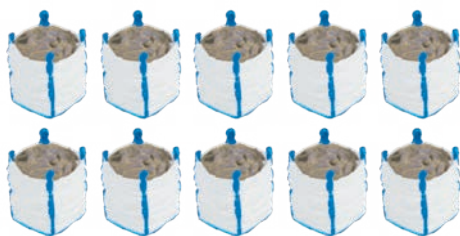

11

130662

»Guarda« Bündnerhaus

This model, inspired by a building from the picturesque village of Guarda in the Lower Engadine, brings authentic Swiss charm to your modelling layout. Perfectly embedded in alpine landscapes, it adds a romantic touch to any mountain backdrop. With its traditional design and attention to detail, this model enriches any scenery and perfectly captures the atmosphere of idyllic Swiss mountain villages.

Epoch I • 128 x 81 x 116 mm • 04/25

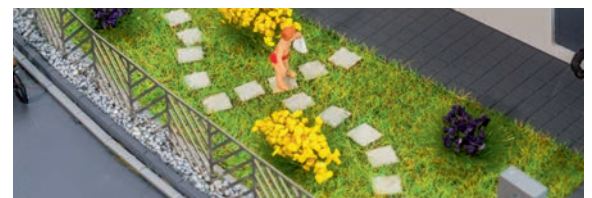

180899

10 Big Bags

The practical big bags are indispensable elements for any miniature construction site or industrial plant. They are ideal for displaying construction site materials or storing bulk goods.

Epoch VI • 12 x 12 x 15 mm • 04/25

180877

Terrace tiles, concrete

These small concrete slabs are perfect for designing terraces, paths and parks. They make it child's play to enhance and embellish the model layout with lovely details.

Epoch V • 4 x 4 x 1 mm • 04/25

130653

Music pavilion

Gentle melodies float through the park and fill the air. They emanate from the small wooden bandstand with its stone floor and ornate decorations. This model is ideal for adding a touch of dreamy charm to both modern and historical dioramas.

Epoch I • 84 x 84 x 73 mm • 03/25

180392

Liquid manure carriage

The two-axle slurry tanker is pulled leisurely across the vast fields. The rustic wooden barrel, reinforced with iron rings, is used to spread the manure and make the soil fertile. This model is ideal for breathing life into an old-fashioned rural scene.

Epoch I • 06/25

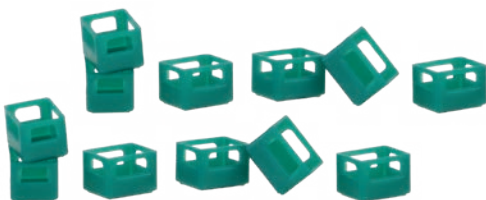

180997

Field cross and boundary stone

The field cross and the boundary stone are particularly nice to give the miniature footpaths more character. Small details like this make the model layout look a little more authentic!

Epoch I • 04/25

180878

12 Beer crates without bottles

The green beer crates (without bottles) add that certain something to any restaurant miniature or drinks shop and bring lively details to your modelling world.

Epoch VI • 03/25

180879

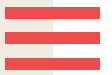

10 Milk cans

Fresh milk for the miniature world! The grey milk churns are perfect for decorating a wide variety of scenarios. Whether at a lively weekly market or traditionally on a milk float - they add a charming touch to the scene and bring a touch of rural life to the model landscape.

»Lavin« Railway station

This station building is modelled on Lavin station in the municipality of Zernez in the Swiss canton of Graubünden. Lavin railway station is located between Sargliains and Guarda stations. There is a loading ramp on both the road and track sides. The deep window reveals and the pitched roof give the building a typical regional look and make it a beautiful centre of attraction for any N model railway layout.

Epoch II • 110 x 74 x 58 mm • 03/25

222106

Two-stall locomotive shed with workshop

This two-stall locomotive shed offers space for two locomotives and comes with plenty of accessories to make the scenery authentic. The robust stone façade gives the model a rustic charm, which is perfectly rounded off by the red tiled roof. A real enrichment for every N model railway layout.

Suitable for locomotives up to 140 mm running length.

Epoch II • 182 x 160 x 70 mm •

Space between centre of tracks: 31 mm • 04/25

»Oesterreich« Passenger ship

Scale model of the Art Deco Lake Constance passenger ship that has been travelling on Lake Constance since 1928. The model shows the current design after the 2019 restoration.

Historische Schifffahrt Bodensee GmbH advertises on its website: »Enchantingly graceful is not only the exterior of the Oesterreich. Anyone who steps onto the gangway and slowly approaches her immediately senses the incredible lightness inherent in this ship. The atmosphere on board is as sparkling and energising as a glass of champagne. After the first tour at the latest, when you step out onto the deck of the Oesterreich with a delicious aperitif in your hand, any thoughts of everyday life are gone. After the extensive renovation, every detail shines.«

We think, that's exactly how it is. A wonderful eye-catcher on a model layout or as a stand-alone model in a display case.

Epoch II • 360 x 63 x 113 mm

282783

Row of townhouses

In the city centre, life pulsates in the spacious alleyways between the rows of houses. The model of a typical row of town houses is ideal for creating such lively scenes. With its loving details, it provides the perfect backdrop for the hustle and bustle of the miniature inhabitants.

Epoch II • Lasercut model • Corner house:
50 x 50 x 72 mm • city gate: 58 x 43 x 68 mm • 02/25

282779

Old town hall

The old town hall, with its half-timbered elements and yellow-brown façade, brings a touch of village charm to any diorama. The numerous windows give the building an inviting appearance, while the grey tiled roof rounds off the look perfectly. Definitely an eye-catcher on the model layout!

Epoch I • Lasercut model • 66 x 54 x 59 mm • 03/25

140311

Nostalgic steam Ferris wheel

Based on the original from the manufacturer Peter Petz, this nostalgic steam Ferris wheel transforms every miniature funfair into a colourful festival. The small baroque decorated gondolas carry the model visitors gently upwards and are a real eye-catcher. You almost want to rush to the funfair yourself to try out this enchanting ride! The kit includes a 5 V DC geared motor and a small controller to regulate the speed of rotation, ensuring that the fun in the miniature world remains in full swing.

Epoch III • Moveable model • incl. motor •

Carousel: 110 x 62 x 93 mm •

Ticket booth: 23 x 23 x 38 mm • 05/25

140419

»Hex'n Wippen« Ride

It's like being bewitched! This funfair attraction is guaranteed to amaze one or two miniature visitors. The model is modelled on the real »Hex'n Wippen«, a fascinating swing ride that is often referred to as a revolving house. It is particularly popular at the Munich Oktoberfest. With an attraction like this, the miniature funfair wonder becomes a real experience! A 16 V hobby motor is included in the kit.

Epoch IV • Moveable model • incl. motor • 144 x 140 x 98 mm • 04/25

161448
SUV MB G-Class »Emergency Doctor« (HERPA)

A white and red MB G-Class SUV drives along the miniature road, ready for its next mission. This model brings momentum and dynamism to the layout.

Epoch IV - 03/25

161449
Car System Start-Set SUV MB G-Class (HERPA)

This set is ideal for getting started with the Car System! It contains everything beginners need to get started right away. The highlight is a red Mercedes-Benz G-Class SUV. The set also includes contact wire, a USB charger with automatic switch-off, road paint, filler and a variety of road decorations.

Technical vehicle details

- Powerful, wear-resistant drive motor
- Solid rubber tyres
- Vehicle contains battery
- Several hours running time per battery charge
- Built-in charging socket
- Without lighting

Epoch IV - 01/25

161447
SUV MB G-Class »THW« (HERPA)

A deep blue G-Class THW SUV MB drives along the miniature road, ready for its next mission. This model brings momentum and dynamism to the layout and was designed to mark the 75th anniversary of the THW.

Technical vehicle details

- Powerful, wear-resistant drive motor
- Solid rubber tyres
- Vehicle contains battery
- Several hours running time per battery charge
- Built-in charging socket
- Use charger (Art. 161415 or Art. 161690 or Art. 161349)
- Without lighting
- Detailed vehicle instructions

Epoch IV - 03/25

161427
MB Sprinter »THW« with blue light (HERPA)

A deep blue THW Sprinter with flashing blue lights drives along the miniature road, ready for its next mission. This model brings momentum and dynamism to the layout and was designed to mark the 75th anniversary of the THW.

Technical vehicle details

- Powerful, wear-resistant drive motor
- Solid rubber tyres
- Vehicle contains battery
- Several hours running time per battery charge
- Built-in charging socket
- Use charger (Art. 161415 or Art. 161690 or Art. 161349)
- With illuminated insert lighting

Epoch V - 05/25

161430

MB Sprinter »THW« (HERPA)

A deep blue THW Sprinter drives along the miniature road, ready for its next mission. This model brings momentum and dynamism to the layout and complements it perfectly!

Technical vehicle details

- Powerful, wear-resistant drive motor
- Solid rubber tyres
- Vehicle contains battery
- Several hours running time per battery charge
- Built-in charging socket
- Use charger (Art. 161415 or Art. 161690 or Art. 161349)
- Without lighting

Epoch V - 03/25

161429

VW T5 »Polizei« (WIKING)

A grey-blue VW T5 in the classic police look races through the city layout to its next mission. This model brings some movement to the layout with its typical design and complements the cityscape perfectly!

Technical vehicle details

- Powerful, wear-resistant drive motor
- Solid rubber tyres
- Vehicle contains battery
- Several hours running time per battery charge
- Built-in charging socket
- Use charger (Art. 161415 or Art. 161690 or Art. 161349)
- Without lighting

Epoch V - 05/25

161428

VW T5 »Taxi« (WIKING)

A beige-coloured VW T5 with a classic taxi look chauffeurs the inhabitants of the miniature world from place to place. This model brings some movement to the layout with its typical design and complements the cityscape perfectly!

Technical vehicle details

- Powerful, wear-resistant drive motor
- Solid rubber tyres
- Vehicle contains battery
- Several hours running time per battery charge
- Built-in charging socket
- Use charger (Art. 161415 or Art. 161690 or Art. 161349)
- Without lighting

Epoch V - 05/25

161939

Laser-Street »Left turn and 45° junction«

02/25

161664

Speed trap

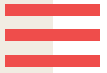

The speed trap is equipped with a very bright LED and is prepared for connection with a series resistor for 12-16V DC. The flashing light is triggered when the built-in sensor (Art. 161773, not included) is passed over. A flashing light box for H0 or N can be built.

H0: 7 x 7 x 29 mm - N: 6 x 6 x 21 mm - 06/25

New shape

The new Car System Digital vehicle with compact digital circuit board and small ultrasonic transmitter brings the latest technology to your modelling system.

161321

Car System Digital MB Sprinter Ambulance »DRK« (HERPA)

The MB Sprinter »DRK« ambulance is a new design and is now equipped with a barely visible ultrasonic capsule measuring just 5 x 5 mm, which enables precise control.

The vehicle is equipped with full digital technology including vehicle localisation and the individual functions can be controlled directly while driving (only with the complete system). With front headlights, rear lights, brake lights and indicators (front and rear emergency lighting) and sound (horn & siren). Multi-stage driving possible.

The acceleration and braking behaviour as well as the speed levels are preset ex works, but can be individually adjusted. Use the »Processor-controlled charging station«, Art. 161349, to charge the batteries.

Car System Digital, App (iOS and Android)

Smart driving pleasure per touchscreen. The Control app for Car System Digital will allow you to constantly keep a general view of your entire installation on your smartphone or tablet. Control your various vehicles with the touch of a finger as well as all vehicle functions and all elements you have previously installed and programmed, such as turnouts, traffic lights or automations. The efficient 3D graphic representation permits rotating and tilting the general view of all routes, changing over to the driver's perspective of a particular vehicle, and easily alternating between the various view windows. The application is available for download in the »App Store« for Apple iOS (iPhone or iPad) and at »Google Play« for Android. For installation and use Car System Digital licence type »Premium« (Art. 161357) is required.

Functions at a glance

Virtual vehicle operation

Experience your system from a new perspective - from the comfort of your desk! Our innovative solution gives you a comprehensive virtual overview of your entire system. Test all functions independently of your real infrastructure and simulate your vehicle fleet with ease. Would you like to expand your fleet? No problem! Add new virtual vehicles in no time at all and test the functionality and operational reliability of your automation systems. Do you have new ideas? Implement additional automation and functions and take your system to the next level!

Voice control

With a connected headset, you have full control - completely wirelessly! Control vehicles, junctions, traffic lights, route sections, routes and automations by voice command. Every vehicle function can be conveniently controlled by voice command. The best thing is that you enjoy complete freedom of movement and have your hands free.

A guide to Model Making

Discover the world of model making! If you want to fulfil your dream of detailed layouts and dioramas, this 80-page guidebook will help you do just that. Many people who are starting out in the modelling hobby or want to start again after a long break are well advised to read this booklet. We show the basics of how to create realistic layouts and dioramas, as well as tips and tricks. From ornate lighting to automatically moving elements such as opening doors or moving water wheels - the possibilities are endless. The innovations in funfair modelling and in the car system are diverse and look impressive at the same time. With high-quality tools and materials, modelling becomes a pleasure. The perfect inspiration for beginners to realise their dream of the perfect model layout.

The flexible and self-adhesive road films impress with a three-dimensional structure and particularly realistic surfaces - ideal for designing roads and floors. They can be easily cut to the desired shape with scissors or a cutter and adhere to almost any surface, such as cardboard, cement, wood, polythene foam or polyurethane. Another advantage is that the textured films can be repositioned or removed several hours after initial application by heating them slightly, which allows for flexible handling. The already realistically coloured surfaces can be further painted and individually designed as desired.

PREMIUM Road films are compatible with the Car System. This means that cobbled streets and other road designs can be easily realised. This means there is not only variety in the vehicles, but now also on the road!

170100

System substructure, 1 m x 0.5 m

1000 x 500 mm - 03/25

The FALLER frame modules provide the ideal basis for layout construction and can be used in a variety of ways - also perfect as a practical model railway table for a wide range of work. The modules come as an uncomplicated kit that can be assembled in just a few minutes: Simply glue all the parts together with Colofix (Art. 180501, not included), without any screws or additional tools! If you want even more stability, you can pre-drill the modules and screw them together. Made from robust, 8 mm thick wood, the modules are both strong and pleasantly light - a clever solution for any modelling project.

Please note: The feet are not included in the scope of delivery. However, they can easily be supplemented with square strips or aluminium feet.

System substructure, 0.5 m x 0.5 m

500 x 500 mm - 03/25

170519

Headband magnifier

The versatile headband magnifier enables hands-free and therefore effortless working.

The easily adjustable headband fits comfortably over glasses and can simply be folded up when not in use. Whether for modelling, hobby projects or electronics work, you always have a clear view of your work! With four interchangeable lenses for 1.5 x, 2 x, 2.5 x and 3.5 x magnification, it's easy to find the right setting for details. Comfort and precision go hand in hand here.

05/25

170554

Cannula cleaning needles, 10 pieces

Anyone who regularly works with adhesives will be familiar with the annoying problem of blocked needles. This is where our cannula cleaning needles come to the rescue: normal needles are often too thick and too short, which is why an ultra-fine cleaning wire made of flexible spring steel has been developed especially for cleaning blocked adhesive cannulas. This wire can be used to gently and efficiently clear the cannula so that the adhesive can flow freely again. The wire can be used universally and can be used several times. Important: After cleaning, be sure to remove the wire to avoid sticking.

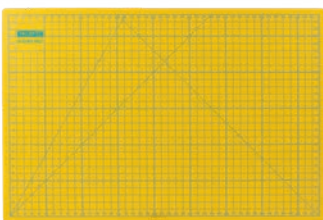

04/25

170518

Cutting mat, A3

With this cutting mat to protect your modelling or workstation, nothing stands in the way of your crafting adventure! The grid print on the surface of the mat, which serves as a cutting aid, makes it perfect for beginners in particular and makes it easier to get started!

297 x 420 mm (DIN A3) - 05/25

TOMYTEC

Tomytec is one of the most important manufacturers of accessories for model railways based on the Japanese model. The focus is on N scale, but H0 scale is also to be expanded in the course of globalisation. The latest addition: the 1:87 scale rail cleaning trolley - available at the end of 2024.

977903

Rail cleaning trolley H0, yellow

The Tomytec rail cleaning trolley is characterised by its simple but realistic design. With the typical golden yellow, RAL 1004, it follows the colour scheme not only of the railway service vehicles of Deutsche Bahn but also of other European railway companies.

- Suitable for direct and alternating current.
- Two differently sized cleaning discs ensure that the outer and middle conductors are cleaned.
- The enclosed sponge is used to polish the tracks.
- Hoover collects loose dust and small parts from the tracks.
- The waste is collected in the container by means of a propeller and air flow.
- The container is easy to empty thanks to the removable lid.
- Cleaning discs and propellers can be easily replaced without tools.
- The desired coupling can be installed using the NEM coupling holder (couplings are not included).
- Two AA batteries are required to operate the functions (not included), a locomotive is used to move the vehicle (not included).
- The Tomytec rail cleaning trolley is designed to be suitable for a minimum radius of $R = 360$ mm.
- It is not possible to digitise the vehicle.

Here you will find the product video.

976425

Rail cleaning trolley N, blue

With suction insert, three polishing and three grinding discs, interchangeable tool, sponge and brush. Ideal for cleaning, sanding and polishing all commercially available N-tracks. A locomotive is required for operation.

976423

Rail cleaning trolley N, Replacement inserts

Three polishing and three grinding wheels, one brush and one sponge.

976424

Rail cleaning trolley N, Replacement inserts

20 polishing and 10 grinding wheels.

971263

Rail cleaning trolley N, Replacement springs

Spare springs for current input in the bogies of track cleaning carriage, 4 pieces, 7.5 mm long.
